## **SUMMER & FALL 2022 COVID-19 Guidelines at Caffè Lena**

**VACCINATIONS:** We are no longer checking for vaccination status.

**MASKS:** Masks are optional for audience members, volunteers & staff. Please bear in mind that masks have more value at a concert than in many public places. When you come to a show, you will be in close quarters with others for more than two hours. We have masks available if you don't have one of your own.

**CARING FOR TOURING ARTISTS:** Many artists are opting out of post-show meet-ups in the lobby because of the need to stay healthy on tour. Others may ask that you wear a mask and refrain from hugs or handshakes if you're visiting the merch table. And others will require that the audience show proof of vaccination upon arrival and remain masked throughout the show. Caffè Lena fully supports musicians who are doing what they need to do to prevent tour cancellations and an illness that is widely known to affect lung capacity. We will post a notice on the individual show if there are mask or vax requirements for that event.

**VENTILATION:** We use portable HEPA filtration units in the performance space. The units run on high before and after the show, and they continue to clean the air on a quiet setting during the performance. In addition, UV lighting has been installed in our HVAC ducts.

If you have questions about safety or have a special need to discuss (for example, you have a medical reason for wanting a private table), please don't hesitate to reach out to us at 518-583-0022 or email [sales@caffelena.org](mailto:sales@caffelena.org).
